Why I Love Life in Tellico Village: It Doesn't Get Any Better Than This

Editor's Note: The following article was penned by our very own Villagers, Romano and Linda Sims, and published in the current edition of "Ideal Living Magazine." Readers can go to <http://www.ideal-living.com/lakeliving/> for even more testimonial information about living in our beautiful community.

By Romano and Linda Sims

We first visited Tellico Village in May of 2003. We came to see old friends who had moved from Northern VA that had been "nagging" us to come visit. We needed a break from the "noise" of Washington, DC and came down on the Memorial Day weekend. The first impression, crossing over the Ft. Loudon Dam on Rte. 321, and seeing the Smokies dead ahead and the lake all around was: WOW! Then both Linda and I agreed this was the place, that weekend we bought a lot on the water and planned to retire and come to Tellico Village permanently in 2008, five years out. During 2004 we visited regularly, met new folks, and became more familiar with the lake, the amenities of Tellico Village and the surrounding area. At the end of 2004, we changed our timetable, sold our house in Northern VA and accelerated our move to 2006 (built the house in 2005) and finally became residents in May 2006, exactly three years after we first visited. We finally retired for the last time in early 2010. So we've been totally living the Village lifestyle now 3.5 years and what a life it is!

We are members of the Tellico Cruising Club (TCC—a club open to any boater on Tellico Lake) and have "Pfun" filled activities. Pfun is a four letter word in Tellico Village: the "P" is silent. However, while our objective is to have "Pfun," our priority, always, is safety. The Club includes members with the most varied boating experience: former cruise ship captains, US Navy submariners, professional fishing boat captains, Great Loopers, etc. But most members of our club own 22'- 26' deck boats. Yes, we also have some large cruisers (42'), many pontoons and a few small (20') runabouts. Many of our members keep their boat at home and many rent slips in the Village. As of our most recent count, there are 175 boats in the TCC.

So, what do we do? Sometimes, too much! Organized TCC activities include weekly raftoffs in one of the many, many coves on Tellico Lake. Usually, an average of 24 boats participate in this activity. Each raftoff is captained by someone who takes responsibility for organizing the activity. The captain chooses the theme of the raftoff (Mardi Gras, Flower Power, Christmas in July, Island Time — you get the idea) and everyone adorns their boats, dons costumes and comes prepared to party according to the theme. At a designated time, we pass food back and forth along the line of boats. No need for dinner after that feast! Some of our members will stay the night while others return home. Note: there is NO obligation to participate in these and other activities; however you must be a member. We also organize trips through the Ft. Loudoun Lock and spend a week on Watts Bar Lake at a resort marina (65 miles downriver). Other TCC organized land based activities include trips to visit the Titanic exhibit, the Lost Sea, an annual Christmas party,

hot dog and corn roast party. It is also common to see TCC members drive their boat to the Tellico Village Yacht Club, have some drinks at the bar with the “million dollar view,” have dinner and then kick up our heels at the weekly Friday night Tiki Bar dance.

We can do as much as we want with as many friends as we want as often as we like, or just sit on our dock, sip a cool one and watch the skiers go by. Life on Tellico Lake is as active as you want or as relaxing as you need. After two years in Tellico Village, my wife no longer needed blood pressure medication. The stress from Washington, DC was gone and, we are convinced, Tellico living will add years to our lives.

It just doesn't get any better than this!

PS: there's sooooo much more, but it's time to sit on the porch, smoke a cigar, drink a scotch and watch the sunset.

Luckily for us our local Tellico Community Players are presenting *The Trial of Ebenezer Scrooge* at the Tellico Village Yacht Club. We would like everyone who is interested in attending the 12:30 p.m. performance Monday, Dec. 9, to RSVP to Sam McQueeney, samnskip@charter.net, no later than Friday, Oct. 25, so we can gauge if this is something the membership is interested in.

A signup sheet will be available at the Oct. 28 meeting. Please be sure to bring your check (made out to the Compass Group, Inc.) for \$35 per person, which includes a full dinner meal and the production, to the October meeting. If you cannot attend the meeting, but would like to join us for the luncheon and play, you can either mail Sam McQueeney your check or drop it off at her home at 139 Chahyga Way.

We would love to have you come check us out. We have a wonderful system of Big Sisters in place to help you navigate GFWC and our chapter in particular. You can volunteer as much or as little time as you like, we would just like you take a little time to get to know us and see if you feel there is a fit. Please check out our website at <http://www.tellicowomensclub.org/> and read what we are all about, be sure to check out our photo gallery, under the About Us tab, to see how much fun we have volunteering our time, as we all know, a picture is worth a thousand words!

Many people who live within the watershed of the Tellico Reservoir and who were drawn here by the beautiful rivers, lakes and mountains which provide the source of our clean water. We all enjoy the many recreational activities that our lakes provide - everything from fishing, boating, and hiking the many trails around the lake. But **HOW DO WE KEEP OUR WATER CLEAN FROM THE MANY THREATS TODAY? THERE ARE REAL THREATS.**

Dr. Squillace will discuss the hazards to our waters as well as talk about what we can all do to keep our water clean. What we can do to reduce contaminants going into our lakes, how we can assist farmers in developing best practices to enhance their profits and at the same time reduce lake pollution, and what threats exist to the Clean Water Act that would put our lakes in danger. This will be a great opportunity to learn from a real expert.
