## **‘What is That Round Black Lid in My Backyard?’**

By Jeff Gagley, Director of Public Works

This is a question that Public Works has been asked on many occasions. For those of you who may not know what that round plastic thing is in your yard, let me take a few moments to describe it and its contents.

The lid covers your 1,000-gallon pumped effluent tank that holds waste from your home. Inside the tank is a 24-inch vault that rests in the center of the tank. All the waste flows from your home into the tank around this vault.

Located in the vault is a 2-horsepower grinder pump and a float system. The float system turns the pump off and on and also signals the alarm system on your control panel when fluid levels are too high. When the waste level gets to a set point, the float activates the pump to start. The pump then moves the waste into the main sewer lines along the streets and into intermittent sewer lift station.

These lift stations are located throughout the Village. They pump all fluids to the main sewer lift station located at the corner of Sequoyah Road and Highway 444. At that point it is pumped to the Loudon Sewer Treatment Plant for final processing. In Kahite it is pumped to the Niles Ferry Treatment plant for final processing.

Along with the 1,000-gallon tank is a gray control panel mounted to your home near the tank with a red warning light. When there is a problem inside the tank, the floats will trigger the audible alarm inside the panel to activate and the red light to start flashing on your panel. Public Works does not want residents to be alarmed when this happens.

You simply go to the panel and press the “silence” button and then call Public Works, 865-458-4522. The staff is on call 24 hours a day, 7 days a week, 365 days a year with trained technicians who will arrive at your home within a short time to assess the problem and make the proper repairs.

If you have any questions about the operation of the pump effluent system on your lot, feel free to contact any of Public Works’ trained staff.

The Public Works staff recommends if you are going to be out of town for an extended period of time, that you may want to pour a box of Rid-X down a drain in your home before you leave. This will keep your tank active while you are gone and prevent major problems in the future.

## **Yacht Club Offerings and Upcoming Special Events**

### **Upcoming Events**
