

Asian Carp Sample Letter #4

I am writing to express my concern of the invasion of the Asian Carp into the Tennessee River, specifically Tellico Lake. We spent our lives working for the day that we could retire, and after a long search we settled in Tellico Village. We have come to love this area. The people, scenery, activities, and the lake have become an important part of our lives. We have seen both Tellico Village and the surrounding area grow not only in population but supporting businesses.

I am afraid that the invasion of the Asian Carp may change all our dreams of living out the remainder of our years in this gorgeous community. It is such a shame to believe that not halting the upstream progress of this fish can absolutely ruin so many lives.

Please help in the efforts to halt the progress of this invasive carp.
